

Washington, DC - Rep. Linda Sánchez today voted for the [American Clean Energy and Security Act](#) to revitalize our economy by creating millions of new jobs, increase our national security by reducing our dependence on foreign oil, and preserve our planet by reducing the pollution that causes global warming.

“I want my constituents to know the facts - the cost of this legislation is equal to about a postage stamp a day - regardless of what critics are saying,” said Rep. Linda Sánchez. “There is no way to quantify the cost of doing nothing, but it is clear that the costs to our economy and environment will be catastrophic compared to the minimal cost of acting now.”

“By making investments in clean energy, we are creating whole new industries with millions of good-paying American jobs, and generating hundreds of billions of dollars in energy savings,” continued Sánchez. “Our actions in Congress today show that the United States is ready to lead the world on the effort to fight global warming and reduce dependence on fossil fuels. We will not stand for any more wasted years of damage to the planet and the health of our children.”
